DETAILED ACTION

Applicants' arguments, filed 06/23/2008, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim 18 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. It would seem that the claim should be properly withdrawn since applicant affirmed the election of the treatment of grey hair in the response filed on 11/30/2007.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 16-17, and 19-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Bjerner et al. (Respiratory Medicine (2000); 94:612-21).

The reference teaches the use of 10 mg of oral montelukast in asthmatic patients ranging from ages 15-65 (abstract; 1st paragraph under Study Design on pg. 613). Administration of the exact same compound in the exact amount (10 mg as disclosed by applicant in EXAMPLE 12 [0084]) to the elderly patients would possess the same property as the claimed method (i.e., the treatment of grey scalp hair).

The discovery of a previously unappreciated property of a prior art composition, or of a scientific explanation for the prior art's functioning, does not render the old composition patentably new to the discoverer. Thus the claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable. MPEP 2112 [R-3]. Furthermore, the discovery of a new use for an old structure based on unknown properties of the structure might be patentable to the discoverer as a process of using. However, when the claim recites using an old composition or structure and the "use" is directed to a result or property of that composition or structure, then the claim is anticipated. MPEP 2112.02.

In this case the treatment of grey hair would necessarily be a property possessed by the administration of 10 mg orally of montelukast as already taught in the prior art.

Claims 6, 16-17, and 19-24 are rejected under 35 U.S.C. 102 (b) as being anticipated by Malmstrom et al. (Ann Intern Med (1999 March); 130(6):487-95).

The reference teaches the use of 10 mg of oral montelukast for patients suffering from asthma and ranging from ages 15-85 (abstract).

Again, as outlined above, the administration of the exact same compound in the exact effective amount to the elderly patients would necessarily possess the same property as claimed.

Conclusion

No claims are allowed.
